AUCTIONEER/SALE MANAGER

Col. Jordan Hunter
 JDH Auction Enterprises, Inc.
 Cell: 417-224-6296

SALE STAFF

- Bill Bowman, Method Genetics 816-752-0079
- Kyle Lynn, Livestock Digital 816-681-3614
- Don Birk, Birk Enterprises 417-860-8595
- Paden Gilbert, Special Assignment 417-689-7274

JUNIOR DISCOUNT

All juniors are eligible to receive a 5% discount on one female purchased in the sale.

SALE TERMS AND CONDITIONS

All cattle sell guaranteed under the Terms and Conditions of the American Angus Association. All cattle must be paid for on sale day, prior to their release, unless prior arrangements with the consignor have been made.

HERD HEALTH

Proper health certificates will accompany each animal for interstate transportation. All breeding age bulls will have passed a breeding soundness exam and will either be a virgin bull or tested negative for Trichomoniasis. All bulls are virgin bulls, unless otherwise noted. All bred females are pregnancy checked and guaranteed pregnant.

SUPPLEMENTAL INFORMATION

An update sheet will be available sale day with any updates that may not have been listed in the sale book. Any announcements made from the auction block will take precedence over any printed material in the sale book.

SALE LOCATION

Interstate Regional Stockyards
 737 State Hwy DD, Cuba, MO 65453

ACCOMMODATIONS

Super 8 Cuba 573-885-2087
 Special rate for East Central Missouri Angus Association.

LIABILITY

All persons attending the sale do so at their own risk, legal or otherwise, for their safety or for the behavior of the animals. The owners, consignors, and sale staff assume no liability for any accident or loss of property that may occur.

Bulls that meet the Show-Me-Select criteria have the Show-Me-Select logo on their pedigree in this sale book.

The Targeting the Brand™ logo is designed to highlight registered Angus bulls with greater genetic potential to produce calves meeting the most challenging specifications of the Certified Angus Beef® brand. Bulls must meet genetic requirements of +0.65 Marbling EPD and +55 \$ Grid of non-parent Angus sires to qualify for use of the Targeting the Brand™ logo.

ONLINE BIDDING: Mariah Miller 712-294-4731

AM EPDs contained in the hard copy of this sale book were current as of print date. Digital versions of this sale book can be viewed online at www.angus.org and will have EPDs updated every Friday with the exception of EPD references in footnotes and photos. Any PDF downloads from the website will contain EPDs current as of the date downloaded. References: American Angus Association®, AHR®, AngusLink®, CAB®, Pathfinder®.

Consigned by LA Genetics and Keith Pittrich

- Selling full possession and half semen interest. Here is your chance to obtain a true game changer. He is a docile, strong, aged herd bull candidate for your operation. Conception was purchased in the 2022 FHCC Family Values Sale from Duane Robertson of Russellville, MO. Shortly after the sale, Conception was sent to Show Me Genetics to collect semen. In his first and only collection as a 14-month-old, he froze 394 viable straws of semen, which is still being utilized today. After obtaining this Yon High Cotton son, we applicable renamed him Conception due to his high-fertility characteristics that he maintains, highlighted by his +21 Heifer Pregnancy EPD. Look at the EPD profile that he is building with 40 progenies already on record at AAA with genomic data. When you sort current Angus Sires today at AAA, Conception is the only current sire today that sorts for his combination of CED, BW, WW, YW, HP, \$M, \$B and \$C. Conception has been an extra quiet, docile herd sire for us. He currently ranks as the 30th Current Sire in the AAA Database for his Docility EPD. His progeny are extremely quiet as well, passing this trait to the next generation. We are only offering this bull currently as we are retaining daughters from this great herd sire! He has worked for us and now he is ready to work for you!
- Dam's Production: BWR 4-102, WWR 4-102, YWR 3-108.
- Performance: Act. BW 58, Adj. WW 652, Adj. YW 1146.
- Ranks in the top 1% for \$F, \$W, DOC, HP, \$M and \$C; top 2% for CW; top 3% for CED; top 10% for \$B, RE, WW and YW; top 15% for BW, CEM, YH and RADG; top 20% for MILK.

- Beautiful 2-year-old Enterprise daughter. We are very pleased with our Enterprise daughters. They are deep-ribbed, thick-topped feminine cows. She has all the signs of a very productive cow. She bred the first time AI and calved before she was 24 months old. Her dam has 5 calves with a 353-day calving interval. She has a wonderful udder with exceptional width in her back quarter. Note her fantastic combination of 11 CED with a 15 CEM, a perfect calving ease cow.
- Sells with a beautiful K A Kindred (AAA 20446645) heifer calf born 2/24/25. BW 58lbs.
- Dam's Production: BWR 4-94, WWR 4-98, YWR 2-94.

MAKE YOUR CATTLE STAND OUT

You've made a significant investment in your genetics, but does the market recognize that? Stand out by differentiating your cattle with AngusLinkSM programs: AngusVerifiedSM and the Genetic Merit ScorecardSM. AngusVerified validates your calves are sired by registered Angus bulls and make your cattle stand apart from other black hides on sale day. The Genetic Merit Scorecard gives buyers the confidence they need to pay more for your quality calves.

Users of the AngusLink programs earn **\$13-15/CWT PREMIUMS** on average. Give us a call, and learn how to claim your competitive edge with AngusLink value-added programs.

AngusVerified and the Genetic Merit Scorecard are administered by IMI Global.

• Consigned by Gilbert Cattle Company

Hickok has made a large impact on the Angus breed over the last 10 years. He is a well-rounded, maternally-oriented bull with super phenotype and calving ease. His progeny have shown to have great phenotype with extra rib shape and muscle. His maternal ability is second to none with a top \$Maternal Index, excellent Heifer Pregnancy, and Docility EPDs. This is a bull that can still produce great females and his semen is hard to find.

• 5 Straws

Lot 100 - Mill Bar Hickok 7242

SEMEN

AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. Accuracy will range from 0 to 1 with an accuracy closer to 1.0 indicating higher reliability. Accuracy is impacted by the amount of information that is included in the analysis including individual genotype and performance records as well as number of progeny and ancestral records.

PRODUCTION

Calving Ease Direct (CED), expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for post-weaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Dry Matter Intake (DMI), expressed in pounds per day, is a predictor of difference in transmitting ability for feed intake during the post-weaning phase, compared to that of other sires.

Yearling Height (YH), expressed in inches, is a predictor of a sire's ability to transmit yearling height compared to that of other sires.

Scrotal Circumference (SC), expressed in centimeters, is a predictor of the difference in transmitting scrotal size compared to that of other sires.

MANAGEMENT

Claw Set (Claw), expressed in units of claw-set score, a lower EPD is more favorable, indicating a sire will produce progeny with more symmetrical, even and appropriately spaced toes compared to another sire.

Foot Angle (Angle), expressed in units of foot-angle score, a lower EPD is more favorable, indicating a sire will produce progeny with an angle closer to 45 degrees at the pastern and appropriate toe length and heel depth compared to another sire.

Docility (DOC), expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

Pulmonary Arterial Pressure EPD (PAP), expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score to decrease the risk of progeny contracting high altitude disease most commonly experienced at 5,500 ft or greater in elevation.

Hair Shed EPD (HS), expressed in units of hair shed score, with a lower EPD being more favorable. This indicates a sire should produce progeny who shed their winter coat earlier in the spring and has improved environmental adaptability in heat stressed areas and grazing endophyte-infected (hot) fescue.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), expressed in pounds of calf weaned, is a predictor of a sire's genetic merit for milk and mothering ability in his daughters. In other words, it is the part of the calf's weaning weight attributes to milk and mothering ability.

Mature Weight (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

CARCASS

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value Indexes, expressed in dollars per head, are multi-trait selection indexes where a higher value suggests more profit. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M), expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning by decreasing mature cow size and improving docility, foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), expressed in dollars per head, provides the expected difference in future progeny pre-weaning performance from birth to weaning.

Energy Value (\$EN), expressed in dollar savings per cow per year with a larger value being more favorable. It assesses differences in cow energy requirements, due to maternal milk and mature cow size.

Feedlot Value (\$F), expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning feedlot merit (growth and feed efficiency) compared to progeny of other sires assuming producers retain ownership of cattle through the feedlot phase and sell on a carcass-weight basis.

Grid Value (\$G), expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), expressed in dollars per carcass, represents the expected average differences in the progeny post-weaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot and sell on a carcass merit grid.

Combined Value (\$C), expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid.

A NOTE FROM THE SALE MANAGER

Fellow Angus Breeders,

Welcome to the 2025 Spring edition of the East Central Missouri Angus Association Sale. The East Central Missouri Angus Association has become one of the leading associations not only in Missouri, but across the Midwest. This Spring we are offering 100 elite lots of Angus genetics from some of the finest breeders from Missouri and Kansas. These consignors have dug deep into their respective herds to sell one of the highest quality sets of cattle to be offered at any consignment sale in recent history.

The herds represented in this sale are offering a great set of Bulls, Fall and Spring Pairs, Bred Cows, Bred Heifers, Elite Embryos, and Show Heifer Prospects. Whether you're looking for a calving ease bull or a high-performance female, this sale has something that could help enhance your herd. There is an opportunity for all breeders in this offering!

We welcome you to attend the East Central Angus Association annual meeting on April 18th at 7pm at the Cuba Knights of Columbus Hall at 7057 Old Highway 66 Cuba, MO. Supper will be provided. Make plans to join us on Saturday, April 19th at 12:00pm for the Spring Sale. We look forward to seeing you! If you have any questions about the offering, feel free to contact Jordan Hunter or any of the consignors listed in the sale book.
